SUMMARY

Results-driven Flutter Developer with 2+ years of experience building high-performance mobile applications that serve 1,000+ active users. Specialized in architecting scalable cross-platform solutions using BLoC and GetX state management, delivering measurable improvements in app performance and user engagement. Proven track record of reducing deployment time by 30% and optimizing app load speeds by 35% through clean architecture implementation.

WORK EXPERIENCE

Flutter Developer, Aviato Consulting (Remote) **March 2024 – Present**

- Architected and deployed 5+ production-ready Flutter applications for international clients, including an Australian government-funded app.
- Improved app performance by up to 35% by applying clean architecture, modular code organization, and optimized widget rebuilding, resulting in smoother UI.
- Integrated 10+ REST APIs and implemented state management using BLoC and GetX, increasing app stability and reducing state-related bugs by 40% across multiple projects.
- Integrated third-party packages and services such as payment gateways, analytics, and push notifications to enhance app functionality.
- Managed full release cycles for 5+ Play Store and App Store deployments, reducing release turnaround time by 30% through automated build pipelines.
- Took ownership of critical project modules, delivering features 10–20% ahead of deadlines while maintaining zero critical production issues across all releases.

Intern | Flutter Developer, Spike Point Infotech Private Limited **Aug 2023 – Feb 2024**

- Improved UI/UX design skills by working closely with design guidelines and creating intuitive user interfaces.
 - Developed leadership and mentoring skills by guiding a team of frontend interns, fostering collaboration and ensuring high-quality deliverables.
 - Learned to balance multiple project requirements and deliver results under tight deadlines.
 - Enhanced understanding of the software development lifecycle and the importance of teamwork in achieving project goals.
-

SKILLS

- **Programming:** HTML, CSS, Python, Flutter
- **Tools:** Atlassian, VS Code, GitHub, Firebase, Postman, Figma, GCP (learning)
- **State Management:** BloC, GetX
- **Operating Systems:** Windows, MacOS
- **Architecture:** Clean Architecture, MVVM, MVC, Repository Pattern
- **Professional:** Teamwork, Communication, Leadership, Problem-Solving, Adaptability, Collaborative Coding

PROJECTS

Netflix-Inspired Portfolio - Built in 4 Hours with AI

- **Tools:** Windsurf AI Cascade, NextJs, Firebase
- Built from scratch in 4 hours with AI assistance: <https://harsh-porwal.vercel.app>
- 98% of the code generated by AI
- Collaborated with AI through 15 conversations and 94 messages
- Inspired by Netflix's theme and content flow, adapted for portfolio storytelling
- Fully live and deployed, demonstrating a seamless, interactive UI

Cloud Certify Web App | Co-Founder & Developer

- Built a web application in Flutter for Google Cloud certification exam preparation: www.cloudcertifyapp.web.app
- Provides multiple mock tests, daily quizzes with a streak system, and a variety of study resources for users.
- Features detailed exam analysis and a leaderboard to foster competition and track progress.
- Designed to help users prepare effectively for Google Cloud exams through engaging and data-driven tools.

CSE Learning Hub | Founder & Developer

- Initiated and developed a mobile app to simplify the study experience for computer engineering students.
- Enabled over 1500 students to access previous papers, study materials, books, and DE reports from various colleges.
- Demonstrated strong problem-solving and product delivery skills by identifying student needs and building an impactful solution.

EDUCATION

Masters of Computer Engineering Kalol Institute of Technology & Research Center	July 2024 – Present
Bachelor of Computer Engineering Swaminarayan College of Engineering & Technology CGPA: 9.0	June 2020 – July 2024
