## SUMMARY

Results-driven Flutter Developer with 2+ years of experience building scalable, high-performance mobile applications and modern web applications using Flutter and Next.js. Skilled in Clean Architecture, BLoC, and AI-assisted development, delivering maintainable, production-ready solutions while adhering to SOLID principles, coding standards, and industry best practices. Certified in Google Cloud Platform and Generative AI, with hands-on experience integrating Firebase, REST APIs, and AI-powered features.

---

## WORK EXPERIENCE

March 2024 – Present

### Flutter Developer, Aviato Consulting (Remote)

- Architected and deployed 5+ production-ready Flutter applications for international clients, including an Australian government-funded app.
- Improved app performance by up to 35% by applying clean architecture, modular code organization, and optimized widget rebuilding, resulting in smoother UI.
- Integrated third-party packages and services such as payment gateways, analytics.
- Managed full release cycles for 5+ Play Store and App Store deployments, reducing release turnaround time by 30% through automated build pipelines.
- Took ownership of critical project modules, delivering features 10–20% ahead of deadlines while maintaining zero critical production issues across all releases.

Aug 2023 – Feb 2024

### Intern | Flutter Developer, Spike Point Infotech Private Limited

- Improved UI/UX design skills by working closely with design guidelines and creating intuitive user interfaces.
  - Developed leadership and mentoring skills by guiding a team of frontend interns, fostering collaboration and ensuring high-quality deliverables.
  - Enhanced understanding of the software development lifecycle and the importance of teamwork in achieving project goals.
- 

## SKILLS

- **Programming:** Dart, Python, JavaScript, TypeScript, HTML5, CSS3
- **Framework:** Flutter, React.js, Next.js, Tailwind CSS
- **Tools:** Atlassian, VS Code, GitHub, Firebase, Postman, Figma
- **State Management:** BLoC, GetX, Zustand (Next.js)
- **Architecture:** Clean Architecture, MVVM, Repository Pattern
- **Backend & Cloud:** Firebase, REST APIs, Google Cloud Platform (GCP)
- **AI:** Generative AI, Claude AI, Gemini CLI & Code Assist
- **Professional:** Teamwork, Communication, Leadership, Problem-Solving, Adaptability, Collaborative Coding

## CERTIFICATIONS

Google Cloud - Generative AI Leader Certification

## PROJECTS

### TestSpec-AI – AI-Powered Automated API Testing Platform

- **Tech Stack:** Next.js, TypeScript, FastAPI, Google Cloud Platform, Vertex AI, Python
- Built the Next.js frontend for an AI-powered platform that generates, executes, and schedules API test cases from OpenAPI schemas or ReDoc documentation.
- Collaborated with the backend developer to integrate FastAPI APIs and Vertex AI, enabling automated test generation, custom testing workflows, and AI-assisted testing.
- Developed responsive dashboards, test execution flows, detailed test summaries, and an integrated AI chatbot to streamline API testing and improve developer productivity.

### ReviewQR - AI-Powered Review Generation Platform

- Built a SaaS platform that increases online reviews by streamlining customer feedback through personalized QR codes and AI-assisted review generation.
- Integrated AI-powered review drafting (Google Gemini) to reduce customer effort and improve review quality across major platforms.

### Maya AI – Devotional AI Chat & Voice Assistant

- **Tech Stack:** Next.js, TypeScript, Google Cloud Platform, ElevenLabs AI
- Built a bilingual (Hindi & English) AI assistant inspired by the Bhagavad Gita, enabling users to interact through both text and voice.
- Developed the responsive Next.js frontend, integrating AI chat, voice interactions, and a seamless user experience.
- Collaborated with the backend developer to integrate FastAPI APIs and AI services, ensuring reliable communication between the frontend and backend.

### Netflix-Inspired Portfolio - Built in 4 Hours with AI

- **Tools:** Windsurf AI Cascade, NextJs, Firebase
- 98% of the code generated by AI
- Inspired by Netflix's theme and content flow, adapted for portfolio storytelling

### Cloud Certify Web App | Co-Founder & Developer

- Built a web application in Flutter for Google Cloud certification exam preparation: [www.cloudcertifyapp.web.app](http://www.cloudcertifyapp.web.app)
  - Provides multiple mock tests, daily quizzes with a streak system, and a variety of study resources for users.
  - Designed to help users prepare effectively for Google Cloud exams through engaging and data-driven tools.
- 

## EDUCATION

Masters of Computer Engineering

July 2024 – Present

Kalol Institute of Technology & Research Center

Bachelor of Computer Engineering

June 2020 – July 2024

Swaminarayan College of Engineering & Technology

CGPA: 9.0
